Volume contents

P.A. Siver & J.A. Wozniak: Lead analysis of sediment cores from seven Connecticut lakes 1–10
J.J. Meriläinen, J. Hynynen, A. Palomäki, H. Veijola, A. Witick, K. Mäntykoski, K. Granberg & K. Lehtinen: Pulp and paper mill pollution and subsequent ecosystem recovery of a large boreal lake in Finland: a palaeolimnological analysis 11–35
N.N. Davydova, D.A. Subetto, V.I. Khomutova & T.V. Sapelko: Late Pleistocene-Holocene paleolimnology of three northwestern Russian lakes 37–51
R.M. Lent & W.B. Lyons: Biogeochemistry of silica in Devils Lake: implications for diatom preservation 53–66
H. Cremer, B. Wagner, M. Melles & H.-W. Hubberten: The postglacial environmental development of Raffles Sø, East Greenland: inferences from a 10,000 year diatom record 67–87
A.S. Ek & I. Renberg: Heavy metal pollution and lake acidity changes caused by one thousand years of copper mining at Falun, central Sweden 89–107

Book reviews 109–118

I. Lobo, A.A. Mozeto & R. Aravena: Paleohydrological investigation of Infernão Lake, Moji-Guaçu River watershed, São Paulo, Brazil 119–129
J.L. Teranes & J.A. McKenzie: Lacustrine oxygen isotope record of 20th-century climate change in central Europe: evaluation of climatic controls on oxygen isotopes in precipitation 131–146
M.L. Heinrichs, I.R. Walker & R.W. Mathewes: Chironomid-based paleosalinity records in southern British Columbia, Canada: a comparison of transfer functions 147–159
B.J. Katz: Lacustrine basin hydrocarbon exploration – current thoughts 161–179
H. Bennion, P.G. Appleby & G.L. Phillips: Reconstructing nutrient histories in the Norfolk Broads, UK: implications for the role of diatom-total phosphorus transfer functions in shallow lake management 181–204
C.M. Wurster & W.P. Patterson: Seasonal variation in stable oxygen and carbon isotope values recovered from modern lacustrine freshwater molluscs: Paleoclimatological implications for sub-weekly temperature records 205–218

Note
K.A. Haberyan: Coring and extruding sediments from shallow lakes with the simple, inexpensive VolksCorer and VolksExtruder 219–223

Book reviews 225–232

Obituary
E.H. Gierlowski-Kordesch: Kerry R. Kelts (1947–2001) 233–239

M. Brenner, C.L. Schelske & L.W. Keenan: Historical rates of sediment and nutrient accumulation in marshes of the Upper St. Johns River Basin, Florida, USA 241–257
J.L. Little & J.P. Smol: A chironomid-based model for inferring late-summer hypolimnetic oxygen in southeastern Ontario lakes 259–270

M. Stein: The sedimentary and geochemical record of Neogene-Quaternary water bodies in the Dead Sea Basin – inferences for the regional paleoclimatic history 271–282
D. Ariztegui, C. Chondrogianni, A. Lami, P. Guilizzoni & E. Lafargue: Lacustrine organic matter and the Holocene paleoenvironmental record of Lake Albano (central Italy) 283–292
M.F. Hilfinger IV, H.T. Mullins, A. Burnett & M.E. Kirby: A 2500 year sediment record from Fayetteville Green Lake, New York: evidence for anthropogenic impacts and historic isotope shift 293–305
I. Larocque, R.I. Hall & E. Grahn: Chironomids as indicators of climate change: a 100-lake training set from a subarctic region of northern Sweden (Lapland) 307–322

Note
P. Francus & C.A. Asikainen: Sub-sampling unconsolidated sediments: a solution for the preparation of undisturbed thin-sections from clay-rich sediments 323–326

R. Quinlan & J.P. Smol: Setting minimum head capsule abundance and taxa deletion criteria in chironomid-based inference models 327–342
O. Henri & A.F. Lotter: Effect of low count sums on quantitative environmental reconstructions: an example using subfossil chironomids 343–350

Book reviews 351–354

M. Hinderer & G. Einsele: The world's large lake basins as denudation-accumulation systems and implications for their lifetimes 355–372
E.E. Gaiser, B.E. Taylor & M.J. Brooks: Establishment of wetlands on the southeastern Atlantic Coastal Plain: paleolimnological evidence of a mid-Holocene hydrologic threshold from a South Carolina pond 373–391
M. Goman: Statistical analysis of modern seed assemblages from the San Francisco Bay: applications for the reconstruction of paleo-salinity and paleo-tidal inundation 393–409
J.M.J. Racca, A. Philibert, R. Racca & Y.T. Prairie: A comparison between diatom-based pH inference models using Artificial Neural Networks (ANN), Weighted Averaging (WA) and Weighted Averaging Partial Least Squares (WA-PLS) regressions 411–422
J. Boyle: Redox remobilization and the heavy metal record in lake sediments: a modelling approach 423–431

Books received 433–434

Volume contents 435–436
